Jl.Kayu Tinggi, Cakung Timur, DKI Jakarta

I am a software developer with strong expertise in web and mobile development, specializing in building modern applications using Flutter & Dart, Firebase, Laravel, JavaScript, SQL, and Tailwind CSS. I focus on building scalable digital products powered by clean architecture, responsive UI, and efficient backend integration. Beyond technical development

Work Experiences

PT Pratama Solusi Teknologi – Purwakarta, Indonesia

Feb 2026 - May 2026

Project-Based Role

- Developed a high-performance, modular, and fully responsive admin dashboard using NEXT.js and Tailwind CSS, delivering a seamless user experience across mobile, tablet, and desktop devices.
- Architected a centralized system settings hub featuring company profile management, dynamic website appearance customization, and third-party service integration modules
- Implemented a robust admin account management system with Role-Based Access Control (RBAC), real-time search functionality, and interactive CRUD interfaces.
- Enhanced UI/UX by integrated smooth layout transitions and micro-interactions using Framer Motion and Lucide React for professional-grade aesthetics.
Engineering reusable components and adhering to Clean Code principles to ensure codebase scalability and maintainability.
- Configured and optimized development workflows with Vite, significantly improving build times and application frontend performance.

Experiences

DBS Foundation Coding Camp – Remote, Indonesia

Jan 2026 - May 2026

Fullstack Web Development Participant

- Selected as a scholarship recipient for an intensive coding bootcamp, focusing on building end-to-end web applications with industry-standard practices
- Mastered Backend Development using JavaScript (Node.js) and integrated it with modern Frontend frameworks to create cohesive digital solutions
- Developed scalable web services and participated in hands-on labs to implement secure authentication and efficient database management
- Achieved multiple certifications within the learning path, demonstrating a commitment to continuous learning and technical excellence

Sekolah Indonesia Riyadh - Riyadh, Saudi Arabia

Aug 2025

Web Development Trainer

Mentored and guided 30+ students in mastering the fundamentals of programming, focusing on building a strong technical foundation in HTML, CSS, and JavaScript basics. Facilitated interactive learning sessions learning outcomes

SDIT Insan Madani - Bekasi, Jawa Barat

May 2025

Web Development Mentor

Technology Education: Taught fundamental web development concepts, including HTML5, CSS3, and JavaScript, to teaching staff

Full-stack Guidance: Guided teaching staff in understanding the web development workflow, from Front-end (UI/UX) to Back-end (logic & database).

Project-Based Learning: Directed hands-on practice sessions in creating simple website projects to sharpen students' problem-solving skills and creativity.

Education

SMK IDN Boarding School - Bogor, Jawa Barat

Jul 2024 - May 2027 (Expected)

Senior High School, Web Development, Software Development

SMP IDN Boarding School - Bogor, Jawa Barat

Jun 2021 - May 2024

Junior High School Android App, Website, Graphic Design & IoT

Organizational & Volunteer Experience

Student Council JHS IDN Boarding School - Bogor, Jawa Barat Indonesia

Jul 2023 - May 2024

Head of Cleanliness Division

Alhamdulillah, I had the opportunity to progress from a team member to the Head of the Cleaning Division in the Student Council, during my junior high school years. This journey allowed me to lead various environmental initiatives, manage large-scale waste management programs during school events, and coordinate with other departments to maintain a sustainable and healthy school environment.

World Muslim Scout Jamboree 2025 - Cibubur, Jakarta Timur Indonesia

Sep 2025

Volunteer Service Team

Streamlined food distribution at service counters to ensure fast and orderly service for participants while collaborating closely with the logistics department to oversee daily inventory and maintain high food quality standards

Skills

Web Development: *PHP, Laravel, JavaScript, HTML, CSS*

Mobile Development: *Dart, Flutter*

UI Frameworks: *Tailwind CSS, Bootstrap, React*

Database: *MySQL, Firebase*

Projects

PulseFi – Financial Behavior Tracking Platform Web – DBS Coding Camp

- Frontend development of a modern financial tracking platform using React.js and Vite, focusing on building a high-performance and interactive user experience for students. Implemented features for employee salary management, including basic salary, allowances, and deductions
- Developed a seamless and interactive UI/UX utilizing Tailwind CSS and Framer Motion, implementing glassmorphism aesthetics and smooth transitions to enhance user engagement
- Developed a smart financial logging system to facilitate intuitive daily income and expense tracking with categories tailored for students and young adults

Tech Stack:

React.js | Vite | Tailwind CSS | Framer Motion | REST API

GajiKu – Payroll Management Website – IDN Vocational High School

- Developed a web-based payroll management system to automate salary calculation and payroll processing for employees.
- Implemented features for employee salary management, including basic salary, allowances, and deductions.
- Generated digital payroll records and salary summaries to support transparency and administrative efficiency.
- Enabled secure access control to ensure payroll data is only accessible by authorized users.
- Designed a clean and responsive user interface using Tailwind CSS to improve usability and user experience.
- Built using PHP Native to handle core business logic and data processing.

Tech Stack:

PHP Native | Tailwind CSS | HTML | JavaScript | MySQL

ScanGo – Ticketing Scanner Mobile Application – IDN Vocational High School

- Developed a high-performance mobile application using Flutter and Dart to streamline the event check-in process through QR code scanning.
- Integrated REST APIs to facilitate real-time ticket validation, ensuring instant synchronization with the central database and preventing duplicate entries.
- Implemented secure authentication and authorization to ensure the scanning tools are only accessible by authorized event staff.
- Optimized camera-based scanning performance for fast and accurate data retrieval, even in low-light event environments.
- Designed an intuitive user interface with haptic and visual feedback to improve the speed and accuracy of the gate management team.

Tech Stack:

Flutter | Dart | REST API | Firebase
