I am an adaptable and highly dedicated Software Developer with a focus on web and mobile application development. I have practical experience designing Flutter and Dart-based mobile applications, as well as building web systems using Laravel, Next.js, and React.js. I am able to connect robust backend logic with intuitive and user-oriented frontend interfaces. I am currently actively exploring Artificial Intelligence (AI) technology to deliver intelligent, efficient, and future-relevant software solutions.

WORK EXPERIENCE

Frontend Developer **Feb 2026 - May 2026**
PT Pratama Solusi Teknologi **Purwakarta, Indonesia**

- Developed a high-performance, modular, and fully responsive enterprise admin dashboard for Ramah Teknologi using Next.js and Tailwind CSS, delivering a seamless user experience across mobile, tablet, and desktop devices.
- Architected a centralized system settings hub featuring company profile management, dynamic website appearance customization, and third-party service integration modules.
- Implemented a robust admin account management system with Role-Based Access Control (RBAC), real-time search functionality, and interactive CRUD interfaces.
- Enhanced UI/UX by integrating smooth layout transitions and micro-interactions using Framer Motion and Lucide React to achieve professional-grade aesthetics.
- Engineered reusable components and adhered to Clean Code principles to ensure codebase scalability and maintainability.
- Configured and optimized development workflows with Vite, significantly improving build times and application frontend performance.

PROJECTS

Corporate & HR Digital Platform **Feb 2026 - May 2026**

- Developed the frontend architecture for an enterprise-grade Corporate & HR digital platform using Next.js and Tailwind CSS, ensuring full responsiveness across all device types.
- Built a high-performance admin dashboard featuring centralized system settings, company profile management, and modular third-party integrations.
- Implemented secure admin management with Role-Based Access Control (RBAC), real-time search functionality, and interactive CRUD interfaces.
- Enhanced user engagement by integrating smooth layout transitions and micro-interactions using Framer Motion and Lucide React.
- Optimized development workflows and improved application build times by configuring Vite.

Tech Stack :
Tailwindcss | Next.js | Laravel | Framer Motion | JavaScript

PulseFi – Financial Behavior Tracking Platform **Feb 2026 - Apr 2026**

- Engineered the frontend architecture of a modern financial tracking platform using React.js and Vite, optimizing application performance and responsiveness for student users.
- Developed a comprehensive financial dashboard, incorporating intuitive features for budget allocation, allowance tracking, and multi-category expense deductions tailored for young adults.
- Implemented a seamless, interactive UI/UX utilizing Tailwind CSS and Framer Motion, embedding modern glassmorphism aesthetics and smooth transitions to boost user engagement.
- Created a smart financial logging system that facilitates real-time tracking of daily income and expenses, using customized visualization categories to help students analyze financial behavior.

Tech Stack :
Tailwindcss | React.js | Vite | Framer Motion | JavaScript | Git

ScanGo - Mobile Ticketing Scanner Application **Feb 2026 - Feb 2026**

- Developed ScanGo, a high-performance mobile event ticketing and scanner application built from the ground up using Flutter and Dart.
- Integrated secure REST APIs to facilitate real-time data communication, allowing seamless server-side verification of ticket data.
- Implemented an intuitive, fast, and robust QR/Barcode scanning module optimized for low-latency code recognition at event gates.
- Designed a clean, user-centric mobile UI/UX to ensure operational efficiency for event staff handling high-volume attendee check-ins.
- Utilized state management practices to handle asynchronous API requests, error handling, and offline data states smoothly.

Tech Stack :
Flutter |Dart | REST API | Git

Skedlo - Task & Schedule Management Application **Feb 2026 - Feb 2026**

- Developed Skedlo, a cross-platform mobile application designed to optimize user productivity through efficient daily task and schedule management.
- Implemented a clean, minimalist UI/UX using Flutter and Dart to enhance readability and ensure an intuitive user experience.
- Engineered an instant data synchronization system across multiple devices, ensuring reliable data availability and seamless state management.
- Integrated secure user authentication mechanisms to guarantee data privacy and safe access control for sensitive user schedules.
- Optimized application performance for asynchronous operations, maintaining smooth rendering and fast response times during data logging.

Tech Stack :
Flutter | Dart | Firebase | REST API

GajiKu – Payroll Management Platform **May 2025 - May 2025**

- Core Systems: Developed a web-based payroll management system to automate salary calculation and payroll processing for employees.
- Salary Architecture: Implemented features for employee salary management, including basic salary, allowances, and deductions.
- Data Reporting: Generated digital payroll records and salary summaries to support transparency and administrative efficiency.
- Security & Access Control: Enabled secure access control to ensure payroll data is only accessible by authorized users.
- UI/UX Design: Designed a clean and responsive user interface using Tailwind CSS to improve usability and user experience.
- Backend Engineering: Built using PHP Native to handle core business logic and data processing.

Tech Stack :
PHP | MYSQL | Tailwindcss | JavaScript | Git

Muzium - Digital Art & History Gallery Platform **Aug 2024 - Sep 2024**

- Developed a high-performance frontend platform using Vite and JavaScript to showcase historical fine arts and masterpieces dynamically.
- Architected a fully responsive, asymmetric layout featuring an abstract Bento Grid section and custom modern typography built entirely with Tailwind CSS.
- Engineered fluid interactive scroll-reveal animations and staggered micro-interactions across components utilizing Framer Motion.
- Implemented custom image filter states (vintage sepia to color transitions) triggered upon user mouse-hover interactions.
- Optimized assets through modern compression and dynamic hashing pipelines, achieving zero downtime deployment via GitHub Pages.

Tech Stack :
HTML | CSS |Tailwindcss | JavaScript | Framer Motion | Vite | Git

TRAINING & PROGRAMS

Full-Stack Development Cohort **Jan 2026 - May 2026**

DBS Foundation Coding Camp 2026

- Selected as a scholarship recipient for an intensive coding bootcamp, focusing on building end-to-end web applications with industry-standard practices.
- Mastered Backend Development using JavaScript (Node.js) and integrated it with modern Frontend frameworks to create cohesive digital solutions.
- Developed scalable web services and participated in hands-on labs to implement secure authentication and efficient database management.
- Achieved multiple certifications within the learning path, demonstrating a commitment to continuous learning and technical excellence.

EXPERIENCE

Web Development Trainer **Aug 2025 - Aug 2025**

Sekolah Indonesia Riyadh **Riyadh, Saudi Arabia**

Mentored and guided 30+ students in mastering the fundamentals of programming, focusing on building a strong technical foundation in HTML, CSS, and JavaScript basics. Facilitated interactive learning sessions learning outcomes

Web Development Trainer **May 2025 - May 2025**

SDIT Insan Madani **Bekasi, Indonesia**

Mentored teaching staff and students in web development fundamentals, building a strong technical foundation in HTML5, CSS3, and JavaScript. Facilitated interactive full-stack sessions covering the entire workflow from frontend UI/UX to backend logic and database integration. Led hands-on, project-based learning through practical website creation to sharpen problem-solving skills and ensure successful learning outcoms

CERTIFICATIONS

Belajar Membuat Aplikasi Web dengan React (Credential ID: L4PQ96RK2PO1) by **Dicoding Indonesia** — **Mar 2026**

Belajar Membuat Front-End Web untuk Pemula (Credential ID: MEPJOLMELZ3V) by **Dicoding Indonesia** — **Feb 2026**

Belajar Dasar Pemrograman JavaScript (Credential ID: 53XEKVV4KXRN) by **Dicoding Indonesia** — **Feb 2026**

Memulai Dasar Pemrograman untuk Menjadi Pengembang Software (Credential ID: EYX4K3955PDL) by **Dicoding Indonesia** — **Jan 2026**

IBM Introduction to Artificial Intelligence (Credential ID: MDL-211) by **IBM** — **Oct 2025**

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Volunteer Service Team — **Sep 2025 - Sep 2025**

World Muslim Scout Jamboree 2025 — **Cibubur, Jakarta Timur, Indonesia**

- Streamlined food distribution workflows at service counters to ensure fast, efficient, and orderly service for thousands of international participants.
- Collaborated closely with the logistics department to oversee daily inventory tracking and manage resource supply chains.
- Maintained high food quality and safety standards consistently throughout the large-scale event operations.

Head of Cleanliness Division — **Jul 2023 - May 2024**

Student Council JHS IDN Boarding School — **Bogor, Jawa Barat, Indonesia**

- Promoted from a core team member to the Head of Cleanliness Division based on leadership capability and performance.
- Led and supervised a dedicated team to execute various environmental sustainability initiatives across the school campus.
- Managed large-scale waste management and sanitation programs during major school events to ensure operational hygiene.
- Coordinated cross-departmentally with other student council divisions to maintain a sustainable, safe, and healthy school environment.
-

EDUCATION

Software Engineering — **Jul 2024 - Present**

VHS IDN Boarding School — **Bogor, Indonesia**

Focused on Full-Stack Development and Software Engineering, with hands-on experience building web and mobile applications through academic, internship, and client-based projects. Developed strong competencies in database management, API integration, and data visualization using industry-standard practices.

SKILLS

Mobile Development: Flutter, Dart

Web Development: React.js, Next.js, Laravel, PHP, JavaScript, HTML, CSS

UI Frameworks & Libraries: Tailwind CSS, Framer Motion, Lucide React

Database: MySQL, Firebase

Tools: Git, GitHub, Vite, REST API

LANGUAGES

Indonesia (Native proficiency) • **English** (Professional working proficiency)
